

# Create a Private App and Generate an API Password (Shopify)

To create a “Private App” in the Shopify Admin Dashboard:

1. Log into Shopify Admin
2. Navigate to Apps > Manage Private app.

3. Click ‘Create private app’

4. Define a title (such as “**PhaseV**”), and set a contact email.
5. Provide full Read/Write access to the following points. All others should be set to "No Access".
  - Orders, transactions and fulfillments
  - Products, variants and collections
  - Inventory

- Fulfillment services
- Locations (READ ONLY)

VI VeraCore Integrations

App details

These details can help you keep track of your private apps and stay informed about changes that affect your app.

Learn more.

Admin API

These permissions determine what data this private app can access. You should enable only what is necessary for your app to work.

Treat the API key and password like you would any other password, since whoever has access to these credentials has API access to the store.

Read our API documentation and our Shopify API License and Terms of Use.

Private app name

VeraCore

Emergency developer email

The email address used for developer communication regarding your app.

Private apps are subject to the Shopify API License and Terms of Use.

API key

Password

Example URL

Private applications authenticate with Shopify through basic HTTP authentication, using the URL format https://(apikey):(password)@(hostname)/admin/api/(version)/(resource).json

Shared Secret

Secrets are used to validate the integrity of webhooks.
